At the center of the I-270 Bio Corridor:

With the FDA, NIH, and Washington, DC in our backyard, Rockville offers an ideal location for startup and existing biohealth companies.

The area's top-tier educational system and quality of life provide the amenities to attract a highly-skilled workforce, while a network of resources ensure the right tools are available to spur your growth.

- 
1. National Institutes of Health
2. US Food & Drug Administration
3. National Institute of Standards and Technology
4. The Universities of Shady Grove
5. Johns Hopkins University Montgomery County

A few of Rockville's outstanding BioHealth companies:

Maxim Biomedical, Inc.

Local Resources:

BioHealth Innovations (BHI)

- Regional innovation intermediary that accelerates and facilitates commercialization of market-relevant research through funding, management, and global markets
- Connects the region's innovation assets to turn promise into prosperity while advancing human health

Relevant Health Accelerator

- A cohort-based health tech accelerator offering an intensive five-month program to promising startups.
- Support includes up to \$50,000 in funding, mentorship, and access to local health tech ecosystem.

Rockville Innovation Center (RIC)

- Incubator ready to accommodate domestic and international technology companies
- Offers full menu of resource and support services in a walkable, downtown location

Industry Incentives

- State of Maryland offers funding for technology commercialization and tax credits for biotech investment
- Montgomery County offers grant programs and tax credits for biotech investment
